9-day Kilimanjaro adventure via Rongai route (7-day trekking + 2 days in a hotel)

---

## Day 1: ARRIVAL

Arrival at Kilimanjaro International Airport (JRO), where you will meet an Altezza Travel representative, and transfer to the hotel under the rate. The hotel will provide all the essentials for a comfortable stay: cozy rooms, hot water, polite staff, a swimming pool, and Internet access. In the evening, there will be a briefing with our managers, who will also make sure you are ready to begin the climb.

### Note:

Check-in starts at 2:00 PM.

## Day 2: TREKKING FROM NALEMURU GATE TO SIMBA CAMP

A guide and a mountain support crew will arrive at the hotel in the morning in order to meet you and hold a quick briefing, after which you will travel by vehicle to Kilimanjaro National Park's northern entrance: Nalemuru Gate (2,020 m). After the quick formality of acquiring climbing permits and registering with the search and rescue service, the group will start trekking up to Simba Camp (2,625 m). Your trek this day will be moderate and take you through coniferous forest up Kilimanjaro's northern slope. Remember not to hurry and always keep a comfortable pace. By the time you reach the camp, our professional mountain crew will prepare everything necessary, put tents and cook dinner for you.

**This will be your first day at this altitude, so it is strongly recommended you heed the following instructions from this point on:**

- Abstain from consuming alcohol and caffeine
- Drink over 4 liters of bottled water daily (little by little, frequently)
- Take a Diamox pill to help alleviate symptoms of altitude sickness. Most mountain climbers take Diamox in the morning, before they start their ascent, in order to reduce discomfort associated with altitude sickness. We recommend you consult your doctor prior to the trip in case of potential allergies.

At night you may experience discomfort associated with acclimatization to the high altitude: because of a reduction in your waking breathing pattern, your body gets less oxygen than during the day. Taking altitude into account, you may therefore start feeling sick and have a headache. Pay attention to your own body and tell your guide if you start feeling any symptoms of altitude sickness.

**Change in Elevation:** Nalemuru Gate (2,020 m) — Simba Camp (2,625 m)

**Hiking distance:** 8 km

**Hiking time:** 3-4 hours

## Day 3: TREKKING FROM SIMBA CAMP TO SECOND CAVE CAMP

Early in the morning after breakfast, the group will depart from Simba Camp to start trekking towards your second high altitude camp: Second Cave Camp (3,480 m). This route is rather easy and will only take around 3 hours, so when you reach the camp you will still have ample time to rest and explore the surrounding area. After lunch you will have a couple hours to rest, followed by an acclimatization hike in the direction of Kikilewa Camp (3,630 m) with a 100-meter gain in altitude, after which you will hike back down to Second Cave Camp.

**Note:**

The acclimatization hike is an easy trek with a slight gain in altitude done in order to speed up the acclimatization process. You should take the acclimatization hikes very seriously. They help increase your chances of successfully summiting Kilimanjaro and save you from the consequences of altitude sickness.

For the entire length of the trekking each pair of climbers will be accompanied by their own guide, who will be monitoring your stamina and mental resolve. After your successful ascent to Uhuru Peak, you can descend to the nearest glacier if desired. Then you will return to Kibo Camp and after a two-hour rest continue your descent to Horombo Camp (3,720 m)
